BOOK DEMO

NO MORE STARE & COMPARE

No more stare and compare coupled with endless clicking by your Disclosure Desk or Post Closers as they work through the file. In a single, user friendly screen, critical information about each disclosure (right down to the fee-level if you want) is tracked, presented side-by-side, and compared to the current values, highlighting in red anything that doesn't match!

Got that one pesky fee that keeps getting overlooked? This tool will keep it from being missed, along with automating your Change of Circumstances process into an itemized print form. This will be your Processors', Post Closers', Disclosure Desk's favorite tool, bar none.
